

Survey Questionnaire to understand the perception and awareness of artificial intelligence (AI) in the academic publishing landscape.

Q1- How well do you understand the concepts of AI, machine learning, internet of things clustering, etc.?

- A. I have sufficient working knowledge about these concepts.
- B. I have a vague understanding of these concepts.
- C. I have just heard these terms, but don't understand them.
- D. Other (please specify)

Q2- What different applications of AI are you aware of in academic publishing? (Respondents could select more than one option from the suggested list)

- A. Plagiarism detection
- B. Image recognition
- C. Data analytics
- D. Language enhancement
- E. Text analysis
- F. Text summarization
- G. Grammar checks
- H. Metadata creation and identification
- I. Content extraction and creation
- J. Translation
- K. Copyright checks
- L. Content discovery
- M. Bots that write manuscripts
- N. Other (please specify)

Q3- According to you, what are the benefits of implementing AI in research and publishing? (Respondents could select more than one option from the suggested list).

- A. Helps in automating repetitive tasks
- B. Assists in reducing overall cost and time
- C. Improves quality of output
- D. Provides evidence base to support human decision-making
- E. Leads to greater product and service innovation
- F. Enables better control over processes and resources
- G. Enhances customer experience
- H. Other (please specify)

Q4- What do you anticipate to be the primary obstacle in implementing AI? (Respondents could select more than one option from the suggested list).

- A. Lack of competencies/understanding of AI
- B. Difficulties in integrating AI-based solutions with existing IT infrastructure
- C. Requires dependence on external expertise for acquiring AI skills
- D. Lack of technical infrastructure/requirement of machines with high computational speed
- E. Scarcity of specialists (trained AI staff)/greater dependence on an external skilled workforce
- F. Organization/company does not yet recognize the need for AI

- G. Cost of implementation/financial investments
- H. Cost of implementation too high (large upfront costs associated with researching and implementing AI)
- I. Lack of standards
- J. Uncertain ROI
- K. Legal concerns, risks, or compliance issues
- L. Other (please specify)

Q5- Which problems in academic publishing will be difficult to solve using AI?

- A. Fake data
- B. Predatory publishing
- C. Review bias
- D. Inaccurate translations
- E. Other (please specify)

Q6- What kind of AI assistance or access do you need in your current role? (Respondents could select more than one option from the suggested list)

- A. Automated test analysis
- B. Global demographic analysis of the publishing landscape
- C. Monitor copyright infringement
- D. Royalty management
- E. Predictive analysis (search trends)
- F. Other (please specify)

Q7- Do you or your department need expert advice on how you can use AI to facilitate your publication journey?

- A. Yes
- B. No
- C. Not right now, but we might need it later

Demographic profile of participants:

Q8- How do you identify yourself (Gender)?

- A. Male
- B. Female
- C. Others
- D. Prefer not to disclose

Q9- Which age group do you belong to?

- A. 18-34
- B. 35-54
- C. 55-74
- D. 75 & above

Q10- In which region are you based?

- A. North America

- B. Asia
- C. Africa
- D. Europe
- E. South America
- F. Australia/Oceania

Q11- What is the size of your organization/institution?

- A. Individual
- B. Small (2-100)
- C. Medium-sized (101-500)
- D. Large-sized (>500)

Q12- What best describes your job?

- A. Graduate student
- B. Postgraduate student
- C. Doctoral student
- D. Established researcher (>5 publications)
- E. Journal editor
- F. Postdoctoral fellow
- G. Publisher
- H. Other (Please specify)
